

Honors Algebra I

Summer Assignment Instructions

Welcome to Honors Algebra I! As you will be entering Honors Algebra I next year, we would like to make sure that you are refreshed on all your Pre-Algebra skills and ready for the year ahead. Throughout the summer we would like you to complete a few tasks on Delta Math (www.deltamath.com). Delta Math is a free online math resource to help you with most any topic in mathematics. We will then continue to use Delta Math throughout the year. If you have any questions, comments, or concerns with Delta Math, please feel free to e-mail Mr. Fromhold at sfromhold@gmahs.org.

1. Create a Delta Math account. You need an email to login. Please write this down somewhere safe, you will need to sign into Delta Math every time. (If you already have a Delta Math account, you do not need to create a new one.)

Use Class Code: F3AY-289T

2. Subject: **Summer 2024 Honors Algebra I**
3. Delta Math will show you the skills that you need to complete. You need to solve **5 problems correctly** from each skill posted. If two skills are posted, you need to solve 10 problems. Click on the show solution button if you are unsure how to solve a problem.

**We ask that you work on Delta Math at least once a week over the summer:
Approximately 10 weeks total for a minimum of 12-15 minutes each**

Week	Skill to Practice:
1	Using Ratio Language Tables of Equivalent Ratios (Guided)
2	Words to Expressions Words to Expressions (Compound)
3	Combine Like Terms The Distributive Property (Level 1)
4	Order of Operations
5	One Step Equations with (Positive) Whole Numbers
6	Two Step Equations Linear Equations with Distribution (Level 1)
7	Three Step Linear Equations Linear Equation with Distribution (Level 2)
8	Linear Inequality and Number Line (Level 1) Linear Inequalities and Number Line (level 2)

9	Linear Inequalities (Level 1)
10	Convert Scientific Notation to Standard Form Convert Number to Scientific Notation

With vacations, camps, etc. we understand that there may be some weeks where you may not be able to log on and other weeks where you can spend more than 12 minutes on Delta Math. We broke this up as a general outline for the summer tasks, yet you by no means must follow this exactly. Just by the start of September we are asking that you have spent **at least 120 -150 minutes (~ 2 hours)** on Delta Math and have attempted all the skills listed in the skills to practice. The more practice you put in the better, but please do not feel like you need to spend your whole summer working through more problems than necessary.

This summer assignment will be considered your first assignment for Honors Algebra I. You will be graded using the following rubric. Part of this grade will come from a 40-point assessment on all the sections listed above. The Delta Math assignment should be completed prior to September 3, 2024.

Category Name	Description	Point Value
Skills Practiced	You will be awarded up to 20 points for the skills you complete correctly on Delta Math. I will convert your grade from Delta Math (out of 100%) to a grade out of 20 points.	/20
Assessment	Score on a 40-point assessment in the beginning of the year on all skills covered above.	/40
Total		/60

Again, please feel free to e-mail Mr. Fromhold (sfromhold@gmahs.org), if you have any questions or concerns about this assignment.

We wish you a safe, happy summer and we look forward to seeing you again in the fall!

The Gwynedd Mercy Academy Mathematics Department
